

Duration: 1 day

Course Number: ISI-CA-03

Description

The course teaches the concepts, techniques, and commands required to operate CA-7. Topics presented include:

- A technical overview of CA-7.
- Online screen access and usage.
- Monitoring current and past production workloads.
- Forecasting future workloads.
- Commands to display and control the system.

An operational lab follows the lecture.

Audience

Operators, scheduling staff and anyone that needs to know the operational functions of CA-7.

Prerequisites

- **Basic MVS JCL**, or equivalent experience.
