

Duration: 1/2 day

Course Number: ISI-CA-05

Description

This course will introduce students to CA-ACF2, the Access Control Facility from Computer Associates International, Inc. Students will learn the purpose and use of ACF2, including:

- The purpose and organization of ACF2.
- How system users are identified to ACF2.
- How ACF2 access rules control system resources.

The course serves as an overview to users who must work in a CA-ACF2 controlled environment.

Audience

Programmers, analysts, technical support personnel, operations, management, security administrators, or anyone working in a CA-ACF2 controlled environment.

Prerequisites

- **Introduction to z/OS**, or equivalent experience.
- **TSO/ISPF**, or equivalent experience.
